

New Look Website

October sees Advanced Solutions launch a new look website. Do you want to know how we can help your business stay safe? Are you in need of professional resources?

www.advancedsolutionsgroup.com.au

#socialmedia

95% of Australians are online for 10 hours (or more) a week! You can now find Advanced Solutions on [Facebook](#) and [Instagram](#).

Young Professional of the Year

Congratulations to Kiran Das on being a finalist in the #australiancomputersociety Young Professional of the Year 2019 awards. Kiran is the founder of BRIKS and a proud partner to ASG.

SPICE TRAINING

Advanced Solutions is proud to announce the acquisition of Spice Training as our Registered Training Organisation (#40914). Through Spice Training we can offer a number of accredited training courses. Contact us to find out more.

SECMC Queensland Visit

Delegates from the Sindh Engro Coal Mining Company (SECMC) travelled to Queensland from Pakistan in August 2019 to invest in learning from Australian business leaders in mining and environmental industries. Hosted by Anthony Beasley, the 7 delegates visited Meandu Mine (Stanwell), Commodore Mine (Intergen) in South-East Queensland, and met with multiple industry representatives, using this opportunity to understand how open-cut mines operate and streamline operations.

"Our field trip to visit the coal mines of Queensland and meeting with some of the key industry people has greatly benefited our mining operation in Pakistan, and provided us with much inspiration, many ideas and some welcome relationships. We are proud of our association with the Qld Coal Mining Industry, and sincerely thank Anthony Beasley for his continued guidance and tireless efforts in assisting us to build a world class mine, along with the valuable support of his colleagues and friends".

Umair Aslam Butt (Manager HSE SECMC Thar Block 2 Mine)

Thank you to those who took the time to impart their knowledge and experience:

The latest from the QLD Mines Inspectorate

VERIFICATION OF TRAINING RECORDS AND COMPETENCIES

The mining inspectorate have been made aware of a number of occasions where the validity of coal mine workers training record documents have been questioned

It is recommended that all SSE's review their Safety and Health Management System to ensure that the following matters are compliant in their training systems:

- A documented process is in place for the management of training records.
- That process requires that training records that are accepted as a true record of the competency of a mine worker who has presented these records from a previous employer, has to have verification from the previous mine to validate these records.
- The provision of training records to a mine worker who has requested these for a future employer, requires that these records be verified and validated as a true record of the competency of a mine worker by the current mine.
- In the case of a mine worker who has presented training records that are not verified as a true record of the competency of a mine worker, there is a process for ensuring these records are not accepted.

The presentation of amended or false training records may result in criminal charges.

RISK MANAGEMENT TRAINING FOR TIER 1 MINER

Risk Management is a vital component of not just running a mine, but most importantly keeping people safe. Recently we took some senior leaders from a top-tier mining company through formal 'Carry out the Risk Management Process (RIIRIS402D)' training in Townsville (known as 'G2'). Collectively, these leaders will harness the key elements to further enhance risk management strategies to ensure that the mine and associated projects stay ALARA (as low as reasonably achievable).

A SELECTION OF OUR PARTNERSHIPS

Advanced Solutions partnered with Mackay mechanical mogul KBX Mechanical back in 2018 and have forged a strong alliance delivering maintenance and contracting solutions to the building, civil, construction and mining industries. Committed to uphold a culture of safety, people, innovation, performance, achievement and sustainability, this JV has the capability and proficiency to deliver large and complex projects.

Advanced Solutions is the proud distributor for Rockhampton based company Rsured which is an innovative, modular, cloud platform that enables you to be in control anywhere, anytime. Integrating and automating your business management systems and provides dashboards to reduce complexity and improves efficiency. Rsured boasts extensive experience in the Agricultural, Engineering, Construction, Engineering, Mining, Manufacturing industries.
